RICHLANDS!
 Tazewell County, Va.

SALE OF Town Lots BEGAN
MONDAY, APRIL 7, 1890.

A fifty thousand HOTEL under contract.
 Fine stone BANK and POSTOFFICE BUILDING under contract.
 A large number of STORES and DWELLINGS under contract.
 A ROLLING MILL under contract.
 Coal mines three miles away and iron mines two miles.
 A Wrought Iron Pipe and Tube Works, organized with a cash capital of \$500,000, and will employ 500 men.
 A Brick and Drain-pipe Works in operation; capital \$100,000.

The Clinch Valley Coal and Iron Company,
 WHICH OWNS THE TOWN SITE.
Offers \$200,000 to Industrial Enterprises to locate at Richlands.
SALE OF LOTS POSITIVELY LIMITED TO \$300,000.

And when this amount is reached the Company will double the price of its remaining lots, making an immediate demand for lots in the hands of first purchasers.

RICHLANDS is on the connecting link between the Norfolk and Western and Louisville and Nashville Railroads and in the direct line of cheap Alabama iron coming North to market.

The Clinch River runs through the town, etc., insuring a good supply of water for the town and good drainage. The land comprised in the town site is almost level and little or no grading has to be done.

The proximity of the Ore and Fuel and the large cash inducements offered insure the success of the town.

Over \$290,000 Worth of Town Lots Have Been Sold.

C GRAHAM, AGENT,
RICHLANDS Tazewell County, Va.

DEPEW SOUTH
 ON THE

Here is a vast country with the best climate in the world, with conditions of health which are absolutely unparalleled, with vast forests untouched, with enormous veins of coal and iron, which yet have not known anything beyond their original conditions; with soil that, under proper cultivation, for little capital can support a tremendous population; with conditions in the atmosphere for comfortable living winter and summer which exist nowhere else in the world; and that is to be the attraction for the young men who go out from the farms to seek settlement, and not by immigration from abroad, for I do not think they will go that way—but by the internal immigration from our own country it is to become in time as prosperous as any other section of the country and as prosperous by a purely American development.

These words apply particularly to Roanoke and vicinity, and

SCOTT & RIVES,
 Real Estate Agents,
 will furnish any information that may be desired as to how to secure bargains in Roanoke property.

CONTINUED FROM FIRST PAGE.

blishment, ice factory, flour mill, and woolen mill have already been secured.

GRAHAM FURNACE COMPANY.
 500 shares of stock at par, \$100,000. Total capital subscribed, \$250,000. Total capital to be raised, \$500,000. Furnace 10 by 10 feet, capacity 125 tons per day, being built at a cost of \$100,000. The furnace will be in blast in September, 1890. The furnace will be supplied with ore from the deposits in the immediate vicinity of the Clinch Valley division and from the New River Coalfield and the Clinch Valley. Within ten miles of the coal field, this furnace will secure its coke at a lower price than any furnace heretofore erected in Southwest Virginia, and probably lower than any furnace in the South. When the Clinch Valley extension is completed to a connection with the Louisville and Nashville railroad system, and the Ohio extension is completed through to Ohio and the system of railroads beyond the Clinch Valley, the furnace will be admirably located for the shipment of its product to both the North and West. The construction of this furnace is being pushed very rapidly.

MAX MEADOWS' IMPROVEMENT COMPANY.
 750 shares of stock at par, \$100,000. Total capital, \$300,000. Total capital subscribed, \$250,000. Practically all subscribed. Max Meadows is in Wythe county, Virginia, upon the main line of the Norfolk and Western railroad. Being one of the most beautiful locations for a town in Southwest Virginia, and has an abundant water supply. Lots will not be put upon the market before next summer or fall.

MAX MEADOWS' IRON COMPANY.
 750 shares of stock at par, \$100,000. Total capital, \$300,000. Total capital subscribed, \$250,000. Practically all subscribed. Furnace, 17x75 feet, with a capacity of 125 tons per day, is being constructed, and will probably be in blast early in 1891. This furnace will draw its principal supply of ore from large deposits of a superior quality of ore owned by the company, distant about three miles. It is a central one for supplies of coke and the various qualities of iron ore, and also for the shipment of manufactured iron to the Northern and Northwestern as well as the Eastern markets.

CLINCH VALLEY AND IMPROVEMENT COMPANY.
 750 shares of stock at par, \$100,000. Total capital, \$300,000. Total capital subscribed, \$250,000. This town site is at the proposed junction of the Clinch Valley Division of the Norfolk and Western railroad and the Louisville and Nashville railroad, and will be very valuable after these railroads are completed, which is expected before the close of this year.

Since January 1st investments have been made as follows, for which money will be required through this year and part of 1891.

CRISTAL SPRING LAND COMPANY.
 200 shares of stock at par, \$100,000. Total capital, \$200,000. Total capital subscribed, \$150,000. This company has only recently been organized. Its lands are located near Roanoke and promise to be very valuable for town purposes. The Virginia Development Company had an interest in the property sold to this company, and made a clear profit of about \$50,000 on the sale.

THE ROANOKE ROLLING MILL COMPANY.
 Loan secured by first mortgage bonds with the privilege of exchanging in stock, \$250,000. This company commenced operations last year, manufacturing bar iron, and is doing a very good business. Additional money was required for enlarging its capacity, and your company made a loan for this purpose.

THE CENTRAL LAND COMPANY OF VIRGINIA.
 1,000 shares of stock at par, \$100,000. Par \$100, issued as full paid. Total capital, \$1,000,000. The town of Buchanan is located 25 miles north of Roanoke, on the Shenandoah Valley railroad, and on the main line of the Chesapeake and Potomac railroad. The James river flows through the town, which has beautiful low land on the river for manufacturing purposes, and high sloping land for agriculture. The company purchased 3,000 acres of this land at an average price of \$50 per acre. Having two main lines of railroad and a large river, this point has always been considered an exceptionally favorable one. Consequently, when the original owners of the company opened books for subscriptions at \$50 per share, 11,000 were subscribed promptly in Richmond, Lynchburg, Roanoke and Buchanan, and further subscriptions were refused as it was thought wise to reserve the remaining 4,000 shares to place with desirable parties who would help the enterprise. It was only on this account that your company was enabled to secure 1,000 shares at the original price. Within two days of the organization meeting of the company, a considerable amount of the stock was sold at \$60, and since then \$70 per share has been offered for small lots. This company is particularly fortunate in having secured its manager, Mr. J. D. Weeks, the editor of the American Manufacturer and Iron World, of Pittsburgh, one of the best iron and coal papers of this country. Mr. Weeks' great knowledge of iron and steel manufacture, his large acquaintance with leading manufacturers, and his personal reputation, will be of the greatest value to this new enterprise.

THE RADFORD WEST END LAND COMPANY.
 150 shares of the stock at par, \$150,000. Total capital, \$350,000. This company purchased 300 acres of land, adjoining Radford, at \$240 per acre. There is a great demand for lots, and it is believed that a large profit can be made.

VIRGINIA REAL ESTATE INVESTMENT ASSOCIATION.
 \$100,000. Total capital, \$500,000. The purpose of this association is to purchase town lots and erect buildings, and do a general business in real estate where it can be done profitably. Its capital will cover a class of investments which it is not intended that your company should make directly, and will very materially assist your company in building up the new towns in the West.

THE SIOGA BRESMER IRON ORE MINE IN CUBA.
 It was considered advisable for your company to be interested in securing a supply of Bessemer iron ores, which may be of great value to the Virginia Iron Company. In January of this year a syndicate of thirty shares was formed for the purpose of taking an option on a Bessemer iron ore mine in Cuba. Your company secured two shares in this syndicate, and \$20,000 has been assessed on each share, and after a very careful examination and favorable report by competent experts, it has been decided to purchase a leasehold of the property. It is believed that this ore will come into the market at a great value to your company, as it can be landed at Norfolk and transported in return empty coal cars to your furnaces for the manufacture of Bessemer pig iron. It is thought advisable, therefore, that your company should subscribe to its full share of the capital required to develop the enterprise. The two shares will entitle your company to subscribe to \$20,000 of the stock of the company to be called for by the Virginia Iron Company.

This subscription has already been authorized by the executive committee.

PROPOSED NEW INVESTMENTS.
 Your company has taken two very valuable leases of coal lands in the Clinch Valley of the Flat-top field, and proposes to make a combination with the Norfolk Coal and Coke Company, which now has two very valuable leases adjoining the two taken by your company. These four leases

comprise about 4,000 acres of the best coal land in the Flat-top field, outside of the Southwest Virginia Improvement Company's leasehold, and they will be operated by the Norfolk Coal and Coke Company. Two hundred acres will be built immediately, making a total of 400 acres for the Norfolk company.

NORTH RADFORD.
 Your company has taken a large interest in a recent purchase of real estate across the New River from the town of Radford. The land is now being prepared for building a bridge across the river, and it is proposed to put this land into an improvement company and sell lots.

RADFORD-CHANEY IRON COMPANY.
 This company proposes to build a blast furnace at Radford, and your company has been asked to subscribe \$50,000.

The report concludes as follows: For detailed information in regard to the iron mines controlled by your company, you are respectfully referred to the report of Mr. E. C. Pechin, the general manager of the company. In addition to the charge of the iron mines, Mr. Pechin has had a general oversight of the construction of the furnaces in which your company is interested and of your other investments. It gives your board great pleasure to testify to the efficient work done by Mr. Pechin in every department, particularly in the very rapid and excellent work in furnace construction. A great deal has been accomplished since Mr. Pechin took charge of the affairs of the company in Virginia, and it is a pleasure to say that your management has been extremely fortunate also in securing the services of Mr. S. H. Chauveau, who will take general charge of the Buena Vista, Salem, Max Meadows and Graham furnaces, with headquarters in Philadelphia. In this way the product of these furnaces can be disposed of without any delay in selling and it is hoped that the best possible results will be obtained because of Mr. Chauveau's very extensive experience and thorough knowledge of the iron business. In concluding it may be said that the future prospects of your company are very bright.

There has been a great advance in the value of town property in Southwest Virginia largely due to the capital expended by you and other companies, and as almost all investments have been made at first prices before any increase in values, the profit on present values are very large. The people of Virginia are fully alive to the opportunities now offering for profitable investment of their money, and new land schemes are being eagerly obtained for enterprises which present assurances of profitable results. At all of the new towns lots have largely enhanced in value over the prices of a few months ago. Available land near any of the new towns is being rapidly laid out into streets and lots, and the lots are rapidly sold and the erection of building and other improvements vigorously pushed. Great care is taken, however, by your managers in selecting investments, and only the best are accepted. It must be borne in mind, also, that in Virginia values of farm and town lands, with one or two exceptions, have not increased during the past 25 years. New industries have been introduced to a very limited extent.

The attention of the public had not been generally attracted to the great natural advantages of that section until within the past six months. During this time there has been a great activity and increase in value, and large amounts of outside capital have been invested. The only real foundation for this is the large amount of new industries which are now in course of construction and in prospect. These new industries have already brought, and will continue to bring, a large population to the new industries. It is, moreover, who heretofore lived in towns distant from the industrial towns, located on lines of railroad, where there is ample opportunity for a farmer to advantageously that has been gradually accumulating, any idle, or to get work at odd times. All this change in population justifies an increase in values of real estate at the favorable places. There are today, in Southwest Virginia, very few towns of 3,000 inhabitants. There is no reason why there should not be as many towns of from 3,000 to 10,000 inhabitants, as in most parts of Pennsylvania, New York and New Jersey, and if this district is to become the iron centre, which is confidently expected, it is only a question of a few years when to the traveler this section will more nearly resemble the active industrial districts of the North, than the quiet farming country which has hitherto been.

No. 124 North Howard Street, Baltimore, Md.

One of the most valuable additions that has been laid out to the city is the Glade Creek property. This is situated just east of Glade Creek and immediately on the dummy line. The fact that it has this line running through it makes it exceedingly more valuable, as it brings it in close proximity to the corner of the city. The fare over the line is only five cents, and places it within the reach of all who attend church, do the marketing and everything of that sort in this part of the city. By having a home in this addition a person can enjoy all the pleasures of a suburban residence and yet get the benefits of city conveniences.

The addition is being laid off by wide streets and avenues, and building sites are rapidly being sold. It is well drained and therefore very healthy.

A company has been organized to erect a water-works plant and the reservoir will probably be erected at an early date. When this is done, the section can be supplied with the clear fluid from the Smith spring. A system of sewerage is to be inaugurated and the sanitary condition improved, though this is hardly necessary, as sickness is almost unknown.

The view from the Glade Addition is one of the finest to be obtained anywhere in this section. Tall mountain peaks, the Roanoke river, several extensive forests are all in full view and form a picture that is very beautiful.

One of the best things about this property is the easy terms on which it can be purchased. Any one can save a few dollars a week from his salary and the lots can be secured so cheap that a few dollars a week saved will almost be sufficient to cover it.

The agents for the company are Messrs. W. M. Yager & Co., 215 North Jefferson street, one of our most enterprising real estate firms. The property is selling very rapidly, so persons contemplating purchasing had better give them a call at once, transportation charges over the dummy line for those who wish to look at the property.

HOLLINS' INSTITUTE.
 Commencement Exercises will take place in the following order:
Monday, June 9th
 At 8 p. m., Elocution and Music.
Tuesday, June 10th
 11 a. m., Art-Exhibition.
 3 p. m., Commencement Concert.
Wednesday, June 11
 10 a. m., Commencement Exercises proper, including an address by Rev. H. A. Tupper, D. D. of Ky.
 4 p. m., Art Exhibition.
 8 p. m., Society celebration, including an address by Hon. John Goode, of Virginia.
 Exercises will be held open to the public. As the Institute is always taxed to the utmost with guests from distant parts, it cannot furnish refreshments to local attendants. There is no objection to "basket dinners" for the grounds provided the proprietors of a place almost exclusively occupied by ladies are duly respected.
 CHAS. L. COCKE, Superintendent.
